

DAY 3

Excel Functions Basics

Function ek ready-made formula hota hai jo calculation aasan bana deta hai. Aaj hum sabse zyada use hone wale basic functions seekhte hain.

Function Ka Structure

- Syntax: =FUNCTIONNAME(argument1, argument2, ...)
- Arguments cells, ranges, numbers ya doosre functions ho sakte hain.
- Range likhne ke liye colon (:) aur alag alag cells ke liye comma (,) use hota hai.
- AutoSum (Alt + =) se sum jaldi lag jata hai.

Statistical Functions

- SUM, AVERAGE, MIN, MAX: numbers ka total, average, sabse chhota aur sabse bada.
- COUNT: sirf numbers count karta hai. COUNTA: khaali nahi hai aisi sabhi cells count karta hai. COUNTBLANK: khaali cells count karta hai.
- LARGE aur SMALL: nth sabse bada ya sabse chhota value.
- RANK: kisi value ka ranking batata hai.

Math & Rounding Functions

- ROUND, ROUNDUP, ROUNDDOWN: decimal places control karna.
- ABS: negative ko positive banata hai. PRODUCT: numbers ka multiplication.
- INT aur MOD: integer part aur remainder (bacha hua hissa).

Important Formulas / Shortcuts

Formula / Shortcut	Kaam (Purpose)
=SUM(B2:B10)	Total
=AVERAGE(B2:B10)	Average
=MIN(B2:B10) / =MAX(B2:B10)	Minimum / Maximum
=COUNT(B2:B10)	Sirf numbers count
=COUNTA(A2:A10)	Non-empty cells count
=COUNTBLANK(A2:A10)	Blank cells count
=LARGE(B2:B10, 2)	2nd sabse badi value
=SMALL(B2:B10, 3)	3rd sabse chhoti value
=RANK(B2, \$B\$2:\$B\$10, 0)	Rank (0 = badi value ko rank 1)
=ROUND(12.567, 1)	12.6
=MOD(10, 3)	Remainder = 1

Practice Tasks

1. 10 students ke marks par SUM, AVERAGE, MIN, MAX nikalo.
2. Sabse zyada marks wale top 3 students LARGE se nikalo.
3. Har student ki RANK nikalo.
4. Average ko ROUND se 2 decimal places tak karo.

Pro Tip: Function likhte waqt Tab key dabane se suggested function auto-complete ho jata hai.
