

DAY 9

Date & Time Functions

Excel me date aur time actually numbers hote hain (1 Jan 1900 se ginti). Isliye inpar calculation aasan hoti hai. Aaj hum date aur time ke functions seekhte hain.

Aaj ki Date aur Time

- TODAY(): aaj ki date (har din auto-update). NOW(): aaj ki date aur abhi ka time.
- Static date daalne ke liye Ctrl + ; aur static time ke liye Ctrl + Shift + ; dabao.

Date ke Hisse Nikalna aur Banana

- YEAR, MONTH, DAY: date me se saal, mahina, din.
- DATE(year, month, day): alag alag parts se date banata hai.
- WEEKDAY: din ka number batata hai. TEXT(date,"dddd") se din ka naam aata hai.

Date Calculations

- Do dates ka fark seedha minus karke nikal sakte ho.
- DATEDIF(start, end, unit): saal ("Y"), mahine ("M") ya din ("D") me fark. Age nikalne ke liye best.
- EDATE: kuch mahine aage/peeche ki date. EOMONTH: mahine ki aakhri date.
- NETWORKDAYS: working days (Sat-Sun chhodkar). WORKDAY: kuch working days baad ki date.

Time Functions

- HOUR, MINUTE, SECOND: time ke hisse. TIME(h, m, s): time banata hai.

Important Formulas / Shortcuts

Formula / Shortcut	Kaam (Purpose)
=TODAY()	Aaj ki date
=NOW()	Date + time
=YEAR(A2) / =MONTH(A2) / =DAY(A2)	Date ke parts
=DATE(2026,5,20)	20-May-2026
=DATEDIF(A2,TODAY(),"Y")	Age (saal me)
=EDATE(A2,3)	3 mahine baad ki date
=EOMONTH(A2,0)	Mahine ki aakhri date
=NETWORKDAYS(A2,B2)	Working days
=WORKDAY(A2,10)	10 working days baad
=TEXT(A2,"mmmm")	Mahine ka naam
=WEEKDAY(A2,2)	Monday = 1 ... Sunday = 7

Practice Tasks

1. Apni date of birth se age DATEDIF se nikalo.
2. Ek order date se 30 din baad ki due date nikalo.
3. Date column se Month name aur Year alag columns me nikalo.
4. Do dates ke beech kitne working days hain, NETWORKDAYS se pata karo.

Pro Tip: Agar date number jaisi dikh rahi hai (jaise 46000) to cell ko Date format me badlo (Ctrl + 1 > Date).
