

DAY 11

Pivot Analysis

Aaj hum pivot table ko aur gehrai se use karna seekhte hain: slicers, calculated fields aur percentage analysis, taaki data se sahi insights nikal sake.

Slicers aur Timelines

- Slicer: button jaise filter. PivotTable Analyze > Insert Slicer.
- Timeline: date field ke liye slider filter (Months, Quarters, Years).
- Ek slicer ko Report Connections se kai pivot tables se jod sakte ho.

Show Values As

- Value Field Settings > Show Values As me: % of Grand Total, % of Column Total, % of Row Total.
- Running Total, Difference From, % Difference From bhi milte hain (growth analysis ke liye).

Calculated Field aur Sorting

- Calculated Field: pivot ke andar naya field banao, jaise Profit = Sales - Cost.
- Sort (Largest to Smallest) aur Top 10 filter se best/worst performers nikalo.
- Conditional formatting se pivot ke values ko color scale ya data bars do.

Doosre Useful Features

- Drill down: kisi value par double click karke uske peeche ka data dekho.
- GETPIVOTDATA: pivot ke kisi specific value ko formula se nikalna.
- Ek hi data se kai pivot tables bana kar alag alag analysis karo.

Important Formulas / Shortcuts

Formula / Shortcut	Kaam (Purpose)
Calculated Field: =Sales-Cost	Profit
Calculated Field: =Profit/Sales	Profit margin
=GETPIVOTDATA("Sales", \$A\$3, "Region", "North")	Pivot se North ki sales
Show Values As > % of Grand Total	Har item ka share

Practice Tasks

1. Region aur Category ke liye 2 slicers lagao aur pivot filter karke dekho.
2. Date field ke liye Timeline slicer add karo.
3. Sales ko % of Grand Total me dikhao.
4. Profit calculated field banao aur Top 5 products nikalo.

Pro Tip: Ek slicer ko kai pivots se jodne ke liye slicer par Right Click > Report Connections chuno.
