

DAY 12

Charts

Charts data ko ek nazar me samajhne layak bana dete hain. Aaj hum alag alag chart types, unko banana aur professional format karna seekhte hain.

Sahi Chart Chunna

- Column / Bar chart: categories ki comparison (jaise product-wise sales).
- Line chart: samay ke saath trend (jaise month-wise growth).
- Pie / Doughnut chart: poore me hissa (kam categories, max 5-6).
- Scatter chart: do numbers ke beech relation. Area chart: total trend + volume.
- Combo chart: ek chart me do type (jaise Sales column + Profit % line).

Chart Banana aur Customize Karna

- Data select karo > Insert > Recommended Charts ya specific chart. Shortcut: Alt + F1.
- Chart Design tab: chart style, colors, Switch Row/Column, Change Chart Type.
- Chart Elements (+ button): Title, Axis Titles, Data Labels, Legend, Gridlines.
- Axis format, gap width aur colors Format pane se badlo.

Special Tools

- Sparklines: cell ke andar mini chart (Insert > Sparklines).
- PivotChart: pivot table par based chart, slicers ke saath interactive.

Best Practices

- Chart me title saaf aur seedha rakho. Zyada colors aur 3D effects se bacho.
- Ek chart ek hi message de. Labels aur legend padhne me aasan hon.

Important Formulas / Shortcuts

Formula / Shortcut	Kaam (Purpose)
Alt + F1	Chart turant insert (same sheet)
F11	Chart nayi Chart sheet me
Ctrl + 1	Format pane open
Insert > Sparklines	Cell ke andar chhota chart

Practice Tasks

1. Month-wise sales ka Line chart banao.
2. Product-wise sales ka Column chart banao aur data labels lagao.
3. Region ke share ka Pie chart banao.
4. Sales (column) aur Profit % (line) ka Combo chart banao.

Pro Tip: Chart ka data range badalna ho to chart par click karo, Excel data ke neeche colored border dikhata hai. Usse drag karke range badal do.
